OBJECTIVE

I'm Monik Rupareliya, a driven and enthusiastic Frontend Web Developer ready to craft engaging digital experiences. With a solid foundation in HTML, CSS, JavaScript, React, jQuery, and Node.js, I'm eager to bring ideas to life and learn from real-world challenges. My goal is to collaborate with an innovative organization where I can grow, create, and make a meaningful impact in the world of web development.

PROJECTS

E-Library

Hackathon Students Startup and Innovation Policy (SSIP) 2022

- Participated in SSIP 2022, tackling the "E-Library" problem statement in a state-level hackathon.
- Developed an online e-library platform using WordPress and cleared the first 36-hour round.
- Enhanced the project for the second round but faced disqualification due to source code requirements.
- Gained teamwork, problem-solving skills, and valuable experience over the 6-7 month journey.

Blood Bank Management system

- Project:** Blood Bank Management System (5th-semester BCA project) developed using PHP, phpMyAdmin, JavaScript, CSS, HTML, and SMTP server.
- Features:** Donor and hospital registration, OTP verification for secure access, and reliable data sharing during emergencies.
- Responsibilities:** Designed UI, structured the database, wrote code, configured SMTP server, and conducted testing.
- Skills Gained:** Enhanced knowledge in secure data handling, full-stack development, and system reliability.

Quiz App

- Quiz App (6th-semester BCA project) developed with ASP.NET and SQL Server for a study-oriented quiz platform.
- Features:** Multiple subject categories, random question selection, and score/ranking tracking.
- Responsibilities:** Designed application architecture, developed the database, and wrote code using ASP.NET, CSS, and JavaScript.
- Skills Gained:** Expertise in database management, application development, and thorough testing/debugging.

My Personal Portfolio Web Site

I designed and developed a professional website to effectively showcase and manage my portfolio, utilizing my web development skills to create a user-friendly and visually appealing platform. The website serves as a central hub where visitors can learn more about me, including detailed information about my educational background, professional experiences, and skill set.

It also includes an in-depth presentation of my projects, each accompanied by descriptions, images, and relevant details that highlight my contributions and expertise. The site is structured to provide a seamless browsing experience, with sections dedicated to my contact information to make it easy for potential collaborators or employers to reach out.

To ensure accessibility and convenience, I have hosted the portfolio online, making it readily available to anyone interested in exploring my work. This project not only demonstrates my technical abilities but also reflects my commitment to personal branding and professional growth.
